

Thiru.Satyabrata Sahoo, I.A.S. Managing Director, Chennai Metropolitan Water Supply and Sewerage Board, as precautionary measures to tackle the north east monsoon with respect to water supply and sewage disposal has conducted a meeting with senior level officers in the Board and issued necessary instructions to maintain water quality, operation of 253 sewage pumping stations by ensuring all Desilting Machineries and pumping equipments in operating conditions.

Accordingly each Area of Chennai has been monitored by a Superintending Engineer and one Executive Engineer along with the Area Engineer and Field Workers to attend the complaints received from the Public towards Sewer overflow, Sewer obstructions and water pollutions and the rectification works are taken up under priority basis. They are instructed to carry out the remedial works continuously without any lapse.

One Assistant Executive Engineer for each shift is posted in Greater Chennai Corporation control room and one Assistant Engineer / Junior Engineer has been posted in Board's control room to receive and for redressal of complaints from public.

One Executive Engineer is specially posted in CMWSS Board's control room to monitor the receipt of complaints and redressal.

One Superintending Engineer is also specially posted to monitor the monsoon activities in most valnarable places in Chennai city.

The damaged manhole covers are identified and replaced. The Sewage pumping stations are being operated round the clock even during power failure using D.G. sets.

The stagnated rain water in the following low lying areas have been disposed by using 43 Nos. of Super Sucker Machines and 25 Nos. of Sewer lorries. In addition to this 41Nos. of Diesel pump sets have been engaged by CMWSS Board to bailout the water in low lying area.
